harmony
PRENATAL TEST

Roche

For You

it's the assurance of accurate fetal
fraction measurement.¹

For Her

it means less worry.

Give her the peace of knowing with the most proven non-invasive prenatal test available.² The Harmony test has a greater than 99% detection rate for trisomy 21.³ And a less than 1 in 1000 false-positive rate.³ Give her the best when she needs it the most. Give her the Harmony test.

Answers that matter.

Supporter of

1. Schmid et al. Ultrasound Obstet Gynecol. 2018 Feb DOI: 10.1002/ulog.19036. 2. Demonstrated by 48 peer-reviewed published studies using the Harmony prenatal test as of Jan 2018. For the entire 48 references, please go to harmonytest.com/references. 3. Stokowski et al. Prenat Diagn. 2015 Dec;35(12):1245-6. 1. Harmony is a non-invasive prenatal test (NPT) based on cell-free DNA analysis and is considered a prenatal screening test, not a diagnostic test. Harmony does not screen for potential chromosomal or genetic conditions other than those expressly identified in this document. All women should discuss their results with their healthcare provider, who can recommend confirmatory, diagnostic testing where appropriate. The Harmony Prenatal Test was developed, and its performance characteristics determined by Ariosa Diagnostics, a CLIA and CAP-accredited clinical laboratory in San Jose, CA USA. This testing service has not been cleared or approved by the US FDA. © 2018 Roche Diagnostics, Inc. All Rights Reserved. HARMONY is a trademark of Roche. The Elecsys® sFlt-1/PIGF ratio.

A simple blood test that provides clarity for clinicians and pregnant women when it comes to preeclampsia¹

Preeclampsia is a serious complication during pregnancy and it is one of the leading causes of fetal and maternal morbidity and mortality.² Clinical management of women with signs and symptoms of preeclampsia can be challenging.¹

The Elecsys® sFlt-1/PIGF ratio is a powerful tool for clinicians to help improve patient outcomes by predicting the onset of preeclampsia.⁶

The ratio can be used to reliably rule out preeclampsia for those with signs and symptoms,⁶ or it can serve to aid in the diagnosis of the disease.⁵

This enables clear and timely decisions, leading to appropriate patient management²⁻⁶ and it gives peace of mind to clinicians and pregnant women.¹

Tuesday 25th June 2019: Joint session with Eurofoetus

08:00 - 09:00 Registration

09:00 - 09:10 Welcome Kypros Nicolaides (UK)

09:10 - 10:00 Achilles tendon of fetal surgery

Discussants: Jan Deprest (Belgium), Michael Belfort (USA)

09:10 - 09:22 Effect of hydration status on fetal membrane frailty Edoardo Mazza (Switzerland)

09:22 - 09:29 Chorioamniotic membrane separation after spina bifida repair Romain Corroenne (USA)

09:29 - 09:36 A sealing system for fetoscopic defects Elisenda Eixarch (Spain)

09:36 - 09:43 Nature and occurrence of fetal surgery complications Adalina Sacco (UK)

09:43 - 09:50 Outcome of subsequent pregnancies after open spina bifida repair Julie Moldenhauer (USA)

09:50 - 10:00 Panel discussion

10:00 - 10:35 Gastroschisis: novel indication for fetal surgery

Discussants: Jan Deprest (Belgium), Alexandra Benachi (France)

10:00 - 10:12 Prenatal findings and natural history Paolo De Coppi (UK)

10:12 - 10:19 Experimental in utero closure Luc Joyeux (Belgium)

10:19 - 10:30 Strategy for a clinical in utero surgery Sundeeep Keswani (USA)

10:30 - 10:35 Panel discussion

10:35 - 13:00 Special lectures

Discussants: Tessa Homfray (UK), Magdalena Sanz (USA)

10:35 - 10:45 Fetal brain development in CDH – MRI study Michael Aertsen (Belgium)

10:45 - 11:00 Agenesis of the corpus callosum Daniela Prayer (Austria)

11:00 - 11:30 Coffee break

11:30 - 11:45 Exome sequencing analysis in fetal defects Mark Kilby (UK)

11:45 - 12:00 3D atlas of human embryology Bernadette de Bakker (Netherlands)

12:00 - 12:15 How a dead duck changed my life Kees Moeliker (Netherlands)

12:15 - 12:30 Imaging genetics of the human face Peter Claes (Belgium)

12:30 - 12:45 Intrauterine determinants of adult disease Kirsten Poore (UK)

12:45 - 13:00 Fetal alcohol spectrum disorders David Germanaud (France)

13:00 - 14:30 Lunch break

14:30 - 19:30 Twins: counselling of prospective parents

Chairs: Yves Ville (France), Liesbeth Lewi (Belgium)

14:30 - 14:37 Embryo reduction in DC twins and TC triplets Shlomo Lipitz (Israel)

14:37 - 14:44 Embryo reduction in DC twins and risk of PE Veronica Accurti (Italy)

14:44 - 14:51 Embryo reduction in DC triplets – radiofrequency ablation Vivian Dimitriadis (UK)

14:51 - 14:58 3rd trimester selective reduction in MC twins Sanne Deneckere (Belgium)

14:58 - 15:10 Discordant anomalies in DC and MC twins Liesbeth Lewi (Belgium)

15:10 - 15:20 Panel discussion

15:20 - 15:32 Death of one fetus in DC and MC twins Mark Kilby (UK)

15:32 - 15:42 Emotional consequences of single death in twins Elena Carreras (Spain)

15:42 - 15:52 Panel discussion

15:52 - 16:04 Monoamniotic twins Tim Van Mieghem (Canada)

16:04 - 16:16 Conjoined twins Paolo De Coppi (UK)

16:16 - 16:23 Panel discussion

16:23 - 16:30 Outcome of spontaneous vs ART MC twins Alicia Martínez-Varea (Spain)

16:30 - 17:10 Coffee break

17:10 - 17:17 Selective FGR: evolution in Doppler patterns Luyao Li (China)

17:17 - 17:24 Selective FGR type 2: endoscopic laser Ramen Chmait (USA)

17:24 - 17:31 TTTS +/- sFGR: short and long-term outcomes Sophie Groene (Netherlands)

17:31 - 17:40 Panel discussion

17:40 - 17:52 TTTS stages 3 and 4 Kurt Hecher (Germany)

17:52 - 18:04 TTTS stages 1 and 2 Yves Ville (France)

18:04 - 18:11 TTTS <18 w Asma Khalil (UK)

18:11 - 18:18 Solomon dichorionization: the primary treatment for all TTTS patients Mara Rosner (USA)

18:18 - 18:25 Patient-specific planning platform for TTTS surgery Elisenda Eixarch (Spain)

18:25 - 18:40 Panel discussion

18:40 - 18:50 TTTS perioperative hemodynamics and neurodevelopment Manon Gijtenbeek (Netherlands)

18:50 - 19:00 TAPS: diagnostic criteria and outcome Enrico Lopriore (Netherlands)

19:00 - 19:07 TAPS: international registry of >300 cases Lisanne Tollenaar (Netherlands)

19:07 - 19:13 TAPS: trial on management Lisanne Tollenaar (Netherlands)

19:13 - 19:20 Normal fetal Doppler in MC twins vs. singletons Daniela Casati (Italy)

19:20 - 19:30 Panel discussion

21:00 - 24:00 Welcome reception (Av. de Villajoyosa, 03016 Alicante)

Introducing Voluson[™] Expert Series BT19

LEADING THE WAY. SETTING THE STANDARDS.

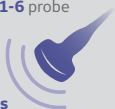

Voluson E-series BT19 | Unique solutions for a healthier future for women

SETTING NEW STANDARDS

Exceptional image quality

Increased penetration with introduction
of **HiPen** & **XDclear[™] C1-6** probe

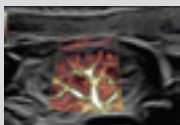

Elevate tissue
differentiation, border
definition expanding
HDRes on all OB probes

Wednesday 26th June 2019: Joint session with Eurofoetus

09:00 - 10:20 Congenital diaphragmatic hernia

Discussants: Jan Deprest (Belgium), Alexandra Benachi (France)
09:00 - 09:07 Prediction of pulmonary hypertension
09:07 - 09:14 Pulmonary hypertension in FETO patients
09:14 - 09:21 Does the gestational age at delivery matter?
09:21 - 09:28 Fetal brain development in CDH – US study
09:28 - 09:35 Smart tracheal occlusion
09:35 - 09:42 MRI assessment of lung volumes
09:42 - 09:50 Panel discussion
09:50 - 10:20 **Severe CDH: debate on FETO outside the TOTAL trial**
Discussants: Kurt Hecher (Germany), Jacques Jani (Belgium)

David Basurto (Mexico / Belgium)
Jimmy Espinoza (USA)
Hanane Bouchghoul (France)
Lennart Van der Veecken (Belgium)
David Basurto (Mexico / Belgium)
Vivien Dutemeyer (Belgium)

Yves Ville vs. Jan Deprest

10:20 - 16:00 Open spina bifida

Discussants: Jan Deprest (Belgium), Magdalena Sanz (USA)
10:20 - 10:35 1st trimester diagnosis of spina bifida: 10years later
10:35 - 10:45 Spina bifida: ultrasound assessment
10:45 - 10:52 Spina bifida: functional deterioration
10:52 - 11:00 Panel discussion

Rabih Chaoui (Germany)
Elena Carreras (Spain)
Francesca Russo (Belgium)

11:00 - 11:30 Coffee break

11:30 - 11:37 Spina bifida: evolution in ventriculomegaly
11:37 - 11:44 Spina bifida: other brain anomalies
11:44 - 11:51 Spina bifida: genetic anomalies
11:51 - 12:00 Spina bifida: technique of postnatal repair
Debate: indications, neurosurgical technique, membranes and prematurity
12:00 - 12:05 Introduction
12:05 - 12:15 - Hysterotomy
12:15 - 12:25 - Mini-hysterotomy
12:25 - 12:35 - Fetoscopy via laparotomy
12:35 - 12:45 - Fetoscopy percutaneous
12:45 - 13:00 Panel discussion

Tim Van Mieghem (Canada)
Lucas Trigo (Spain / Brazil)
Selima Ben Miled (France)
William Whitehead (USA)

Jan Deprest (Belgium)
Julie Moldenhauer (USA)
Fabio Peralta (Brazil)
Michael Belfort (USA)
Denise Lapa (Brazil)

13:00 - 14:30 Lunch break

Debate: dissemination of spina bifida repair

14:30 - 14:45 Fetal surgery registry: hysterotomy
14:45 - 15:00 Fetal surgery registry: fetoscopy
15:00 - 15:10 Fetal surgery: learning curve
15:10 - 15:20 Open repair: maternal and fetal complications
15:20 - 15:30 Panel discussion
15:30 - 15:37 Fetal surgery: effect on fetal Doppler
15:37 - 15:44 Fetal surgery: effect on motor function
15:44 - 15:53 Fetal surgery: effect on posterior fossa and brain stem
15:53 - 16:00 Panel discussion

Julie Moldenhauer (USA)
Magdalena Sanz (USA)
Luc Joyeux (Belgium)
Martin Meuli (Switzerland)

Rogelio Cruz Martinez (Mexico)
Romain Corroenne (USA)
Thomas Deprest (Belgium)

16:00 - 16:30 New approaches to fetal therapy

Discussants: Dick Oepkes (Netherlands), Michael Belfort (USA)
16:00 - 16:10 Neck tumors: fetal tracheoscopy and intubation
16:10 - 16:20 Rh disease: treatment with M281
16:20 - 16:30 Thulium laser in fetal medicine

Rogelio Cruz Martinez (Mexico)
Dick Oepkes (Netherlands)
Michael Belfort (USA)

16:30 - 17:15 Coffee break

17:15 - 19:30 Preterm birth

Discussants: Roberto Romero (USA), Gerry Visser (Netherlands)
17:15 - 17:30 Preterm birth: survival and long term outcome
17:30 - 17:40 Need for steroids at 34-37 weeks
17:40 - 17:50 Panel discussion
17:50 - 18:00 Prediction of preterm birth and intraamniotic infection
18:00 - 18:20 Treatment of intraamniotic infection and intraamniotic inflammation
18:20 - 18:30 Panel discussion
18:30 - 18:37 Prediction in twins: single vs serial measurements of cervical length
18:37 - 18:44 Cervical consistency in singletons and twins
18:44 - 18:51 Prediction of imminent birth: cervical sliding sign
18:51 - 18:58 Cervical length screening depends on population characteristics
18:58 - 19:05 Preterm clinic: prediction and prevention of preterm birth
19:05 - 19:20 New ideas about preterm labor
19:20 - 19:30 Panel discussion

Enrico Lopriore (Netherlands)

SILVER SPONSOR

Rethink prenatal screening. Think NIPT.

Gain more confidence. Get fewer false positives.

It's time to change the way you think about prenatal screening.

Visit us at booth 4 to learn more.

<https://emea.illumina.com/clinical/reproductive-genetic-health.html>

Noninvasive prenatal testing (NIPT) is a screening test; it is not diagnostic.
Results should be confirmed by diagnostic testing prior to making any pregnancy management decisions.

Antoni Borrell (Spain)

Francisca Molina (Spain)

Mar Gil (Spain)

Shelley Dougan (Canada)

Pavel Calda (Czechia)

Ann Tabor (Denmark)

Eugene Pergament (USA)

Alexandra Benachi (France)

Jacques Jani (Belgium)

Peter Benn (USA)

Oliver Kagan (Germany)

Mireille Bekker (Netherlands)

Francesca Grati (Italy)

16:30 - 17:15 Coffee break

17:15 - 17:22 cfDNA test in early pregnancy losses

17:22 - 17:32 Fetal cells in maternal blood

17:32 - 17:40 Panel discussion

Antoni Borrell (Spain)

Jiri Sonek (USA)

17:40 - 19:30 Fetal ultrasound meets genetics

Presenters: Tessa Homfray (UK), Katia Billardo (Netherlands)

Rabih Chaoui (Germany), Oliver Kagan (Germany), Elena Greco (UK)

Saturday 29th June 2019

09:00 - 09:16 First trimester anomaly scan

Discussants: Katia Billardo (Netherlands), Jon Hyett (Australia)
09:00 - 09:06 Methodological standardization of the 11-13 week scan
09:06 - 09:16 Performance of routine screening

Nicola Volpe (Italy)
Argyro Syngelaki (UK)

09:16 - 09:50 Special lectures

Discussants: Katia Billardo (Netherlands), Jon Hyett (Australia)
09:16 - 09:28 Birth asphyxia and cerebral palsy
09:28 - 09:38 Maternal mortality across Europe
09:38 - 09:50 Management of morbidly adherent placenta

Gerry Visser (Netherlands)
Anca Panaiteanu (Romania)
Mohamed Momtaz (Egypt)

09:50 - 10:40 Labor and birth

Discussants: Gerry Visser (Netherlands), Jon Hyett (Australia)
09:50 - 10:00 Macrosomia: adverse perinatal outcome
10:00 - 10:07 Machine learning model for prediction of shoulder dystocia
10:07 - 10:14 Levator ani co-activation in the active second stage of labor
10:14 - 10:21 Cervical shear wave elastography: prediction of outcome in labor induction
10:21 - 10:28 Prediction of placenta previa at the 20 week scan
10:28 - 10:40 Re-engineering the interpretation of fetal monitoring

Ranjit Akolekar (UK)
Abraham Tsur (USA)
Rasha Kamel (Egypt)
Tak Yeung Leung (China)
Charlotte Jansen (Netherlands)
Mark Evans (USA)

10:40 - 11:00 Obesity and diabetes

Discussants: Gerry Visser (Netherlands), Jon Hyett (Australia)
10:40 - 10:47 The Impact of maternal obesity on gestation-specific risk of stillbirth
10:47 - 10:54 Does bariatric surgery change pregnancy outcome?
10:54 - 11:01 Prediction of the need for insulin treatment in gestational diabetes mellitus

Naila Ramji (Canada)
Alexandra Matias (Portugal)
Makarios Eleftheriades (Greece)

11:00 - 11:30 Coffee break

11:30 - 13:00 Neurosonography

Discussants: Magdalena Sanz (USA), Elisenda Eixarch (Spain)
11:30 - 11:37 Isolated non-severe ventriculomegaly: neurodevelopment
11:37 - 11:44 Routine assessment of proximal hemisphere
11:44 - 11:56 Consequences of short corpus callosum
11:56 - 12:03 Corpus callosum in congenital heart defects
12:03 - 12:15 Panel discussion
12:15 - 12:35 Sonographic visualization of the optic chiasm
12:35 - 13:00 Presentation of diagnostic challenges

Nadine Hahner (Spain)
Lorena Hormazabal (Chile)
Eldad Katorza (Israel)
Miriam Pérez-Cruz (Spain)

Guillermo Azumendi (Spain)
Ritsuko Pooh (Japan)

13:00 - 14:30 Lunch break

Introducing Voluson[™] Expert Series BT19

LEADING THE WAY. SETTING THE STANDARDS.

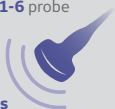

Voluson E-series BT19 | Unique solutions for a healthier future for women

SETTING NEW STANDARDS

Exceptional image quality

Increased penetration with introduction of **HiPen** & **XDclear[™] C1-6** probe

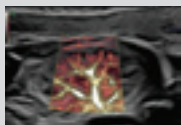

Elevate tissue differentiation, border definition expanding **HDRes on all OB probes**

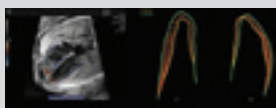

Expand usage of **Radiantflow[™]**

Enhanced perfusion of small vessels with **SlowflowHD[™]**
(optional in the E8)

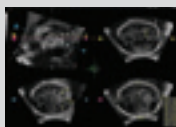

EMPOWERING OUR CUSTOMERS

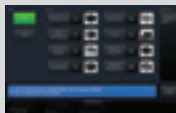

Fetal heart package – introducing **fetalHQ[™]**

Automation to help analyze fetal brain – **SonoCNS[™]**

Gynecology protocols with **IETA** report, **IDEA** Scan Assistant Protocol & **IOTA ADNEX[™]** Assessment

ENHANCING WORKFLOW AND CONNECTIONS

Simplifying workflow – **expanded xTouch capabilities** for **HDlive[™]** light adjustments and OmniView line definition

Improved efficiency with **Scan Assistant** enhancements and offline configurator

Ongoing **updates to ensure privacy and security**

* FDA clearance pending
